

I believe you are making a rash decision here. First of all you need to think of all the people this will affect. This will affect the big businesses who manufactured the original television. They will have a lot of angry customers who paid for HDTV only to find out that they will not be getting it until they purchase this new "protection." Well the truth is it does not protect the consumer, it protects you and your wallets. Don't let greed influence your decision on changing technology that has already been established.
